

# SNO-CONE MACHINE

## INSTRUCTION MANUAL

\* Ice, flavored syrup and cups are not included \*

### **INSTRUCTIONS:**

#### **SAFETY TIPS**

- Snow cone machine should be plugged on its own outlet to provide sufficient current
- Keep fingers and hands away from shaving unit when motor is running
- Insert only ice into the snow cone ice crushing compartment

#### **SET UP**

- Place machine on a stable, level surface. Recommended to use outside due to condensation or water leakage from machine during use
- Set up machine near a grounded, electrical source, so an extension cord is not needed
- Inspect machine to ensure all parts are properly secured and in place

# SNO-CONE MACHINE

## INSTRUCTION MANUAL

---

(cont.)

### **INSTRUCTIONS:**

#### **OPERATING**

1. Plug in and turn snow cone machine ON.
2. Lift the snow cone machine's handle and fill with 3-4 inch ice cubes
3. Place drain hose in a bucket or tray to catch the water from melting ice.
4. Depress the motor switch while firmly pushing down the handle to crush ice. Too much pressure results in coarse ice. Too little pressure makes ice mushy
5. Scoop ice into the snow cone container and pump desired flavored syrup onto the ice.
6. When finished, turn switches OFF, and unplug the machine.
7. Remove all ice from hopper and machine. Wipe dry with a towel.
